

FLOORBALL RINK

PREMIUM

The new PREMIUM rink from Renew Group Sweden AB sets a new standard for floorball rinks in terms of sustainability, materials and design.

We have gathered a lot of information from our teams and federations to create the best floorball rink out there. The demands are always increasing along with the growth of the sport, and that is why we are very proud to present this high end rink to the market.

STABLE CONSTRUCTION

The construction is created to maintain sustainability in the rink for a long time, mixing 6 mm hard plastic with aluminum bars creating a light-weight construction with great durability. The fastening device between the rink parts is made of aluminum for optimized durability.

LOW TIP-OVER RISK

Our rink is constructed with the user in mind, and therefore we have created a stable rink adapted for different purposes and areas. We have added a large plastic back plate that makes the rink stay in its position when getting exposed to bumps and contacts, making the tip-over risk very low. When assembled, the straight parts work together with the corners to keep the rink in its normal position.

INNOVATIVE DESIGN

The PREMIUM rink has been given shiny neon orange color on the top bars to make it stand out from the floor. The new plastic surface has been chosen to create a brand new look for the rink and the brushed aluminum bars add to the high quality feeling that we are looking for.

WHITE SUBSTITUTION AREAS

Our PREMIUM rink is equipped with 8 special made substitution area parts with white color on the top bars, giving a more professional and visible look in the arena. This is included in the PREMIUM rink, making the substitution areas consist of 4 rink parts for each team.

TRANSPORTATION & STORAGE ADVANTAGES

We are proud to introduce a special made solution for rink transportation giving the customer the possibility of easier and cheaper transportation. The rink is delivered on one trolley with 6 stable wheels, and comes with one extra trolley for optimal usage depending on the arena or area.

COMMERCIAL VALUES

The shiny surface makes it easy to add marketing logos that stick well on the parts. The possibility of having logos also on the backside of the rink opens more options for creating marketing values for visitors in the arena. Our corners come with our ZONE or UNIHOOC logos included in the price.

SECURE MOUNTING

An important part of our new rink concept is the mounting process. The rink is lightweight and easy to carry and the fastening device is easy to understand. As seen in the pictures, practical straps make it simple to attach the parts to each other in an easy and good looking way. An extra 10 pcs of straps are included free of charge with the delivery.

SUSTAINABLE MATERIALS

The new rink has been created in full compliance with the standards of the European REACH law. The REACH regulation is a law that ensures that products within the EU do not contain any prohibited or dangerous chemicals. The plastic parts are made of thick 6 mm PP plastic which has long durability and the frame is made of high quality aluminum.

MEASUREMENTS

- A complete PREMIUM rink 40 x 20m (inner size).
Rinks can be customized according to required measurements.
- Weight: 683kg
- Transportation measurements: 250 x 65 x 230cm

PRICE

- 40pcs of 2.5m parts
- 4pcs of 1.5m parts
- 4pcs of corners
- 2 trolleys with wheels

PRICE WILL BE GIVEN SEPARATELY
